

FOR IMMEDIATE RELEASE

Wescorp Energy Ships First **H2Omaxx Water Remediation Unit for Operations in Kansas, USA**

HOUSTON, Texas and CALGARY, Alberta

(Tuesday May 26, 2009) – Wescorp Energy Inc. (OTCBB: WSCE), an oil and gas technology solutions provider, is pleased to announce that a 2,000 barrel per day **H2Omaxx** water remediation unit has been shipped to Kansas to begin full operations for an oil and gas producer. **H2Omaxx** is a commercially proven, safe, effective and economical process for cleaning and separating oil and solids from produced water using patented technology. Test results on the **H2Omaxx** unit have been shown to reduce the oil content in produced water to less than 0.001% or 10 parts per million oil allowing oil and gas operators to reduce, reuse, and recycle water.

In July 2008, Wescorp signed a master lease agreement with a private oil and gas company with operations in Texas, Kansas and Wyoming, to construct, deploy and operate, at the election of the customer, up to 256 **H2Omaxx** water remediation units over a 60 month period. This will be the first unit shipped under the master lease agreement.

“The deployment of the first **H2Omaxx** unit is a great step forward for Wescorp Energy,” commented Mark Norris, Chairman of Wescorp. “By strategically placing the first unit in a deemed water crisis area in Kansas, it proves our confidence in the **H2Omaxx** technology and its ability to help our customers and the environment.”

“We are excited to showcase our **H2Omaxx** technology in Kansas. Our customer has agreed to allow other oil and gas operators, government officials and potential investors to visit the site and view its operations. They have also agreed to share their internal data that proves through the use of the **H2Omaxx** units, well productivity is enhanced and production costs are significantly reduced,” commented Doug Biles, President and CEO of Wescorp Energy. “We are confident that Wescorp’s water technology will offer significant benefits to our client by improving the recovery of residual hydrocarbons entrained in produced water.”

Wescorp and Weatherford are continuing to work towards finalizing our long-term global distribution license agreement.

About Wescorp

Wescorp Energy Inc. (www.wescorpenergy.com) is an oil and gas operations solutions company focused on commercializing technologies that overcome tough operations challenges facing oil and gas operators today.
