

FOR IMMEDIATE RELEASE

Wescorp Energy's H2Omaxx water remediation unit begins successful operations in Kansas

HOUSTON, Texas and CALGARY, Alberta

(XXXXXX July XX, 2009) – Wescorp Energy Inc. (OTCBB: WSCE), an oil and gas technology solutions provider, is pleased to announce that the **H2Omaxx** water remediation unit operating in Marion County, Kansas is in initial operating mode. The **H2Omaxx** unit is currently providing remediation services for one conventional oil well. Produced water and contaminated fluids from additional oil wells located in adjacent sections will be tied into the **H2Omaxx** unit for remediation servicing shortly.

First indications are “The **H2Omaxx** unit is performing well,” commented Doug Biles, President and CEO of Wescorp Energy. “With the anticipated increased volume of hydrocarbon laden fluids from the additional oil wells, the **H2Omaxx** unit would be functioning at its full capacity. Wescorp will be performing internal tests to verify the efficiency and efficacy of the **H2Omaxx** unit at various capacities. Assay results from an independent laboratory based in Wichita, Kansas will be released when available.”

Once we receive lab results, Wescorp will be scheduling site visits for other oil and gas operators to view the **H2Omaxx** unit in operation and provide the internal quantitative analysis reports

H2Omaxx is a commercially proven, safe, effective and economical process for cleaning and separating oil and solids from produced water using patented technology. Test results on the **H2Omaxx** unit have been shown to reduce the oil content in produced water to less than 0.001% or 10 parts per million oil, allowing oil and gas operators to reduce, reuse, and recycle water.
